HOW TO READ ROMAN NUMERALS

- A horizontal line over the letter increases its value 1,000 times. (X = 10, X = 10,000)
- A letter repeated once or twice repeats its value that many times. (XXX = 30, CC = 200)
- One or more letters placed after another letter of greater value increases the greater value by the amount of the smaller. (VI = 6, LXX = 70, MCC = 1200)
- A letter placed before another letter of greater value decreases the greater value by the amount of the smaller. (IV = 4, XC = 90, CM = 900)
